

Announcement No. 6/2023

Environmental and Climate Change Policy

SCG Chemicals Public Company Limited is committed to driving the organization towards sustainable growth. Therefore, this policy has been established to demonstrate the intention to conduct business together with taking care of the environment and climate change with its efficiency and effectiveness of management.

The policy outlined herewith shall be applied to all production operations and business facilities from designing, procuring, manufacturing, providing services and solutions, distribution and logistics, and management of waste and end of used products including to encourage and support business partners in value chain and service providers both tier 1 and non-tier 1 such as non-managed operations, joint venture partners, outsourcing partners, new project, modification project, due-diligence, mergers and acquisitions both Thailand and overseas as follows:

1. Conduct business in compliance with regulatory requirements, international environmental and climate standards relevant to SCG Chemicals operations in accordance with global issues and in response to local concerns in line with Sustainable Development framework.
2. Operate business with regard to climate change adaptation in alignment with the Paris Agreement challenge targets toward carbon neutrality by 2050. These shall include sustainable use of natural resources, energy and water through reducing the environmental impact by increasing eco-efficiency with the principles of the circular economy, reduce waste both hazardous and non-hazardous with commitment to zero waste to landfill, prevent and control air emissions, treat and reuse effluent efficiently, protect biodiversity and ecosystems, develop low-carbon and environmentally friendly products, services and solutions, sustainable supply chain management and green procurement.
3. Assess environmental and climate change risks, determine strategies, objectives, targets, qualitative and quantitative indicators, and proactive and reactive environmental and climate change action plans, as well as follow-up and review of the performance by the management to support resources to operate appropriately and efficiently, including continuous improvement.
4. Implement the environmental, energy and climate management system or guidelines for other relevant standards along with performance monitoring and reporting, continual improvement and audit of its management system to uplift environmental performance and climate change prevention.

5. Raise awareness of environment and climate management, as well as enhance knowledge and skills necessary for internal and external stakeholders such as employees, contractors, and customers etc. to prevent environmental impacts.
6. Disclose and take responsibility for reporting environmental and climate performance in accordance with expectations of stakeholders in order to mitigate, prevent, and enhance the performance to achieve the specified targets.

This environmental and climate change policy is part of SCG Chemicals Public Company Limited's vision. Therefore, the company both Thai and oversea must implement them appropriately for their business operations. It is the responsibility of all executives and employees to practice it as a good example, instilling it as the organizational culture. All companies must communicate and adapt to this policy to be suitable for business operations.

This policy shall be effective July 1, 2023 onwards

Announced on June 30, 2023

(Mr. Tanawong Areeratchakul)

Chief Executive Officer and President
SCG Chemicals Public Company Limited
