Product Description

SCG HDPE H568JA is a high density polyethylene resin with excellent environmental stress cracking resistance and good mechanical properties balance. It is particularly designed for light-weight carbonated soft drink caps. This resin have excellent processability for both injection molding and continuous compression molding.

Typical Application

Beverage caps and closures
• Carbonated soft drink
• Sparkling water

Product Characteristics

• Excellent processability
• Excellent environmental stress cracking resistance
• Good mechanical property
• Good organoleptic property

International Compliance

• US FDA 21 CFR 177.1520
• Commission Regulation (EU) no. 10/2011

Note: Direct food contact is subjected to the extraction provisions of the regulation on the finished food contact package.

Note: the given values are typical value measured on the product. Values herein are not to be constructed as a product specification.

**Processing Guidelines**

The actual processing condition depends on each machine type, product size and mold design. Generally, melt temperature should be 190-230°C for injection molding and 160-190°C for continuous compression molding. The exceed melt temperature than 250°C might affect organoleptic property.

**Product Technical Assistance**

For technical assistance or further information on this product or any other SCG Chemicals' products contact your SCG Chemicals technical service at the address or telephone number as specified below.

**Storage**

- Store in original container in tidy according to the manual of Handling and Storage from Thai Polyethylene Company Limited/ Thai Polypropylene Company Limited.
- Product(s) should be stored in dry and dust free location at temperature below 50°C and protected from direct sunlight and/or heat, well-ventilated area, away from incompatible materials and food and drink, as this may lead to quality deterioration, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.
- Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.
- The storage area should be stable and not be slopped.

Safety

• The product is not classified as a hazardous material.
• Please see our Material Safety Data Sheet for details on various aspects of safety, recovery, and disposal of the products; for more information, contact your SCG Plastics/SCG Performance Chemicals technical service.

Recycling

• The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.
• Please see our Material Safety Datasheet for details on various aspects of safety, recovery and disposal of the products; for more information, contact your SCG Plastics/SCG Performance Chemicals technical service.

Related

• The latest version of this document will be available at our website, www.scgchemicals.com, or can be obtained from the SCG Plastics/SCG Performance Chemicals technical service.
• The following related documents are available on request, and represent various aspects on the usability, safety, recovery and disposal of the product.
  ○ Material Safety Datasheet
  ○ Statement on compliance to food contact regulations
