TECHNICAL DATA SHEET

Product Name
SCG PP

Product Type
Polypropylene Impact Copolymer

Product Grade
P483JU

Product Description
SCG PP P483JU is a developmental of high stiffness polypropylene impact copolymer product which contains anti-static agent and UV stabilizer. It is designed for very high stiffness, creep resistance, and high heat resistance while maintain a good impact strength than those of general impact copolymer polypropylene and suitable for injection molding application.

Typical Application
• Returnable transport packaging such as Pallet, Crate and Container
• Automotive parts
• Electrical appliance parts
• Any parts require outdoor uses agent

Product Characteristic
• Excellent stiffness
• High impact strength
• Good processibility
• Good dimension stability
• High heat resistance
• Good UV resistance
• Contained anti-static agent

International Compliance
• RoHS Directive 2011/65/EU
• REACH Regulation (EC) 1907/2006

Note:
- Conversion factor for changing unit from kg/cm² to MPa is divided by 10.20
- The given values are typical value measured on the product. Values herein are not to be constructed as a product specification.

Processing Guidelines
The actual processing conditions depend on each machine type, product size, mold design and environment.
Recommended processing conditions:
- Melt temperature: 210-250°C
- Mold temperature: 25-70°C
- Injection speed: Fast
- Screw speed: 40-70 rpm
- Pressure: Injection 40-80%
- Packing and Holding 30-60%
- Back 10% of Max Pressure
Product Technical Assistance
For technical assistance or further information on this product or any other SCG Chemicals’ products contact your SCG Chemicals technical service at the address or telephone number as specified below.

Storage

• Store in original container in tidy according to the manual of Handling and Storage from Thai Polyethylene Company Limited.
• Product(s) should be stored in dry and dust free location at temperature below 50°C and protected from direct sunlight and/or heat, well-ventilated area, away from incompatible materials and food and drink, as this may lead to quality deterioration, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.
• Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.
• The storage area should be stable and not be slopped.

Safety

• The product is not classified as a hazardous material.
• Please see our Safety Data Sheet for details on various aspects of safety, recovery, and disposal of the products; for more information, contact your SCG Plastics/SCG Performance Chemicals technical service.

Recycling

• The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.
• Please see our Safety Data Sheet for details on various aspects of safety, recovery and disposal of the products; for more information, contact your SCG Plastics/SCG Performance Chemicals technical service.
Related Documents

- The latest version of this document will be available at our website, www.scgchemicals.com, or can be obtained from the SCG Plastics/SCG Performance Chemicals technical service.
